# Rahmat Hidayat

Software Developer

Tangerang, Indonesia | +6283827744608 | rahmath123756@gmail.com | LinkedIn | Github

## SUMMARY

I started my programming journey by learning independently, then I went deeper by attending the Hacktiv8 bootcamp as a full-stack web developer for 4 months, with complex material about web development. I have experience working as a Network Engineer but have not yet studied coding. In the end I decided to leave my previous career to pursue what had become my passion to work in the field of software development

## EDUCATION

**Politeknik LP3I Jakarta (D3)**                                          **Tangerang, Indonesia**
*Management Information (Employee class)*                        *September 2023 - Present*

**Hacktiv8**                                                                   **Jakarta, Indonesia**
*Full Stack JavaScript Immersive Program (Transcript)*           *May 2023 - September 2023*

**SMK Tri Bintang Purwadadi**                                              **Ciamis, Indonesia**
*Computer and Network Engineering*                                          *2017 – 2020*

## WORK EXPERIENCE

**PT. Transmarco**                                                         **Tangerang, Indonesia**
*Warehouse Staff*                                                        *July 2022 – March 2023*
- Handle hundreds of orders swiftly and deftly 300pcs/day
- Handling incoming goods for new stock and reporting incoming goods
- Perform maintenance of goods and layouts according to standards that have been tested

**PT. Adhelin Data Solution**                                               **Ciamis, Indonesia**
*Network Enginner*                                                      *August 2021 – June 2022*
- Handle customer complaints and reprimands and provide solutions quickly and meticulously according to company standards
- Regular server maintenance, setting up new devices for customers or other supporting devices such as routers, modems, network antennas
- Familiar with proxy devices, and network devices that use optical fiber for periodic maintenance

## SKILLS

**Language:** JavaScript, Python (basic)
**Front End:** React.JS, Redux, Vue.JS, Pinia, React Native, Solid.JS, HTML & CSS, Apollo Client, TailwindCS, jQuery
**Back End:** Node JS, Express, Sequelize, PostgreSQL, GraphQL, Apollo Server, MongoDB, Redis, Rest API, MVC architecture, MySQL, AWS, Docker Container
**Other :** Mikrotik, MS Office

## PROJECTS

**Flip And Bomb**
Turn Base game with leaderboard system. Build with ReactJs and TailwindCSS
*Tech Stack: RreactJS, Redux, TailwindCSS, ExpressJS, PostgresSQL, Sequelize*          *September 2023*

**NUTRI GUIDE**                                                                    *May 2023*
A static html that can display nutrition from daily food and other contents
*Tech stack: HTML - CSS, TailwindCSS*

**Note-List**                                                                      *June 2023*

A note and todo list app where you can invite friends and share with friends
*Tech stack : TailwindCSS, Vue. JS, Pinia, Axios, Express. JS, Node PostgreSQL, Sequelize*

## CERTIFICATIONS

**IT Network System Administrator**
IT competition and district-level network administrators                         *Issued on 2019*
*Certificate: [Certificate](#)*                                                   *No expiration date*

**SQL (Basic)**
SQL Basic from hackerrank                                                         *Issued on 2023*
*Certificate: [Certificate](#)*                                                   *No expiration date*

**HTML, CSS, Javascript for Web Development**
HTML, CSS, Javascript for Web Development from The Digital Adda                    *Issued on 2023*
*Certificate: [Certificate](#)*                                                   *No expiration date*

**React JS**
React Js Certificate from the digital Adda                                        *Issued on 2023*
*Certificate: [Certificate](#)*                                                   *No expiration date*

**React JS  (Basic)**
React Js Certificate from Hackerrank                                              *Issued on 2023*
*Certificate: [Certificate](#)*                                                   *No expiration date*

**Python (Basic)**
Python Certificate from Hackerrank                                                *Issued on 2023*
*Certificate : [Certficate](#)*                                                   *No expiration date*

**Node Js (Basic)**
Node Js Certification from Hackerrank                                             *Issued on 2023*
*Certification:  [Certification](#)*                                              *No expiration date*
